

How would I go about getting this DATABASE into my ASP.NET project in VISUAL WEB DEVELOPER. Would I copy and paste or drag and drop or something else.

There are no usable controls in this group. Drag an item onto this text to add it to the toolbox.

```
<?xml version="1.0"?>  
<!--  
For more information on how to configure your ASP.NET application, please visit  
http://go.microsoft.com/fwlink/?LinkId=169433  
-->  
<configuration>  
  <connectionStrings>  
    <clear/>  
    <remove name="localSqlServer" />  
    <add name="localSqlServer" connectionString="Data Source=tcpsql2k512.discountasp.net;Initial  
    <add name="cat181ConnectionString1" connectionString="Data Source=tcpsql2k804.discountasp.net  
  </connectionStrings>  
  <system.web>  
    <compilation debug="true" strict="false" explicit="true" targetFramework="4.0" />  
  </system.web>  
</configuration>
```

This is where those two folders go but I need to find out how to get the DATABASE into this folder from the other program.

I have put those two folders into my application it just does not show in this .PDF because I did it after I created this .PDF
